

# Recommender Systems

# Recommender Systems

## Introduction

- information filtering system
- predicts user preferences and recommends items

- Inputs:

Item

- previous purchases
- search history

- Output:

- recommend items to buy/consume
- helps to discover new items

User

- demographic information, age, sex, income, ...

# Recommender Systems

## Applications

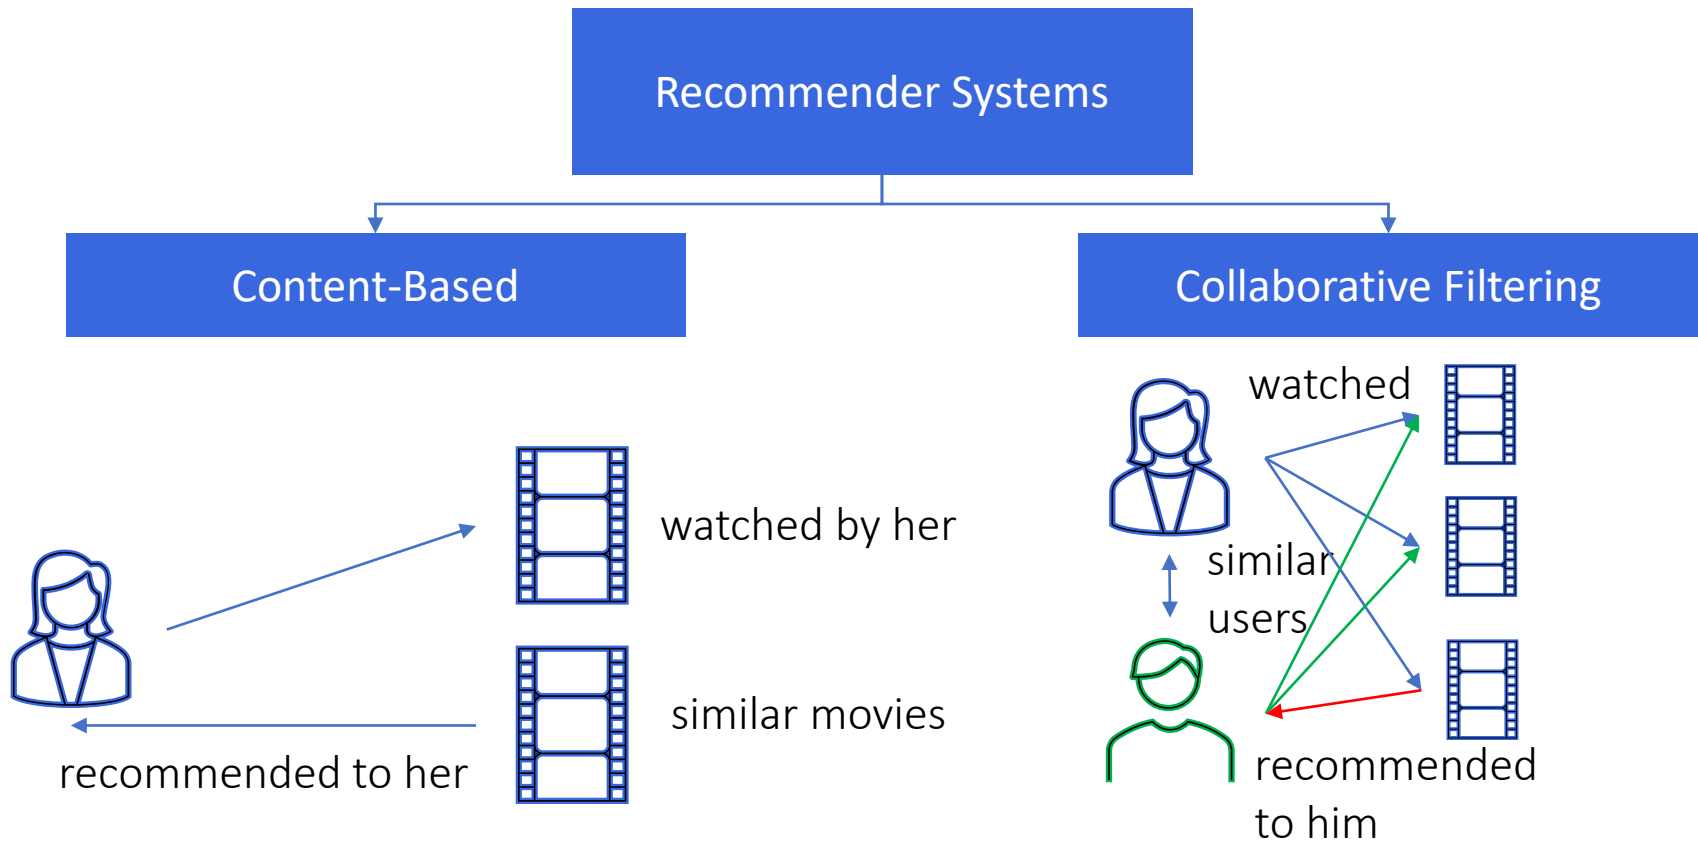

Personalized  
Sales,  
e.g. E-Commerce

Personalized  
Content,  
e.g. streaming platforms

## Evaluation Metrics

Precision@k

$$= \frac{\text{\#relevant recommendations}}{\text{\# recommended items}}$$

measures ability to recommend all relevant items

Recall@k

$$= \frac{\text{\#relevant recommendations}}{\text{\# all possible relevant items}}$$

measures ability to reject non-relevant items

# Recommender Systems

## Data

- MovieLens Dataset
- personalized movie recommendations
- Small dataset used
- 100,000 ratings
- 3,600 tag applications
- 9,000 movies
- 600 users
- Last updated 9/2018

The screenshot shows the GroupLens website header with navigation links: about, datasets, publications, and blog. Below the header is the 'MovieLens' section title. The main text describes the dataset collection and usage, including a link to the MovieLens website and a section for seeking permission to use the data.

## MovieLens

GroupLens Research has collected and made available rating data sets from the MovieLens web site (<https://movielens.org>). The data sets were collected over various periods of time, depending on the size of the set. Before using these data sets, please review their README files for the usage licenses and other details.

**Seeking permission?** If you are interested in obtaining permission to use MovieLens datasets, please first read the terms of use that are included in the README file. Then, please [fill out this form](#) to request use. We typically do not permit public redistribution (see [Kaggle](#) for an alternative download location if you are concerned about availability).
